

mobia solutions

A complete “Software as a Service” warehouse and manufacturing management system with an *industry leading traceability solution*for a monthly per-user expense of less than a daily shot of java*

* No extra charge for that warm and fuzzy feeling!

Warehouse & Distribution Management
Manufacturing & Process Management

Traceability and Recall Support

Work Flow Management
Asset tracking
Bar-coding & RFID
Infinitely customizable
Easily Extended, Expanded , and Linked To
Standard “Web Services” Interfaces

Now Everyone Can Afford Inventory and Manufacturing Accuracy, WMS, Bar-coding, and the Best Traceability and Genealogy in the Business

By leveraging the power of the Internet and the latest advances in software, Mobia can offer companies of any size or budget the same basic software that has been keeping industry giants running efficiently and safely for over a decade. **These customers include companies such as Cargill, Roche Pharmaceuticals, Dairy Farmers of America, Riceland, and others.**

Now, for less than a \$1.00 an hour per user, operations of any size can have access to an industry leading **warehouse and production management system** with **traceability** and **genealogy** features that other systems can't come close to matching.

Because Mobia is a “Software as a Service” product it was designed from the ground up to communicate with your existing business systems through industry standard “Web Services”. This means Mobia can be connected to virtually anything from MS Excel spreadsheets to SAP ERP software and almost anything in-between.

“One size fits all” is seldom true and we understand that. So while Mobia and its partners offer everything from complete turn-key hosted solutions to self-hosted, “roll your own” solution using our libraries and API's.

What you *don't* get is high risk capital intensive IT projects that lock you into a single source provider.
